Pyramid solitaire saga lost boosters

Hello, I was on level over 700 on pyramid solitaire. I was connected to fb before. However, I accidentally connected to fb again and lost all my progress. What can I do to get my progress back? Please help! -- solved! 0 · My boosters disappeared a few days ago and tried to contact support through the game without satisfaction as the contact function does not work. I am very unhappy with these disappearances as it seems that you people are trying to deceive the players. Most of these we won as awards by passing levels, some were purchased. This happened to me with Candy Crush and I stopped playing. See that my boosters are returned to me or I will stop playing this game as well as never play another King game EVER again! 0 · For the past four days, all my boosters have been gone since the game was last updated. I play on my PC, Windows 10. I downloaded the app from the Microsoft Store in April 2018. This is the only device I play the game on. At first I thought I just needed to restart my computer because you guys had an update. I did that and nothing came back. I thought then maybe I had a bad connection or was disconnected from Facebook, so I logged in and logged back into my account. This didn't solve the problem either. All my hardware is up to date and I get frustrated enough that I'm about to remove this game. I see that other people have been having this problem and recently and none of the information provided to them has solved my problem. Any help would be great. I had my boosters built up from collecting the treasure chest and the hidden bonus levels that occasionally pop up. I'm on level 577 and the boosters were: Remove Blockers - 8, next card in deck - 58, all cards up - 37, Extra Jokers - 16, Scepter of Power - 3, Extra Cards - 7. 0 · Pyramid Solitaire Saga is one of the most popular and attractive puzzle-card games on Android, which is released for free on Google Play for Android by King Studio. Any with the same problem? 2 · All my pre-boosters and while playing boosters are gone! I've been playing this for a long time and completed the last level.
